RE: Call for OLIS Beam Requests for Schedule 121 (Winter 2012)

We are planning the ISAC operation for the experimental program for 2012 and at present we are considering OLIS stable beam operation from March 1, 2012 to May 23, 2012. At this time, we are opening the call for beam request for OLIS beams for ISAC.

Please use <https://mis.triumf.ca/science/beam/request/home.jsf> to submit your request.

Requests will be open until midnight Vancouver time (23:59) January 31, 2012, and a preliminary schedule will be made available February 6, 2012.

For 2012 we are planning to have OLIS beam available for experiments and developments from March to May 23 (Schedule 121) and pending shut-down activities ISAC RIB developments April 16, 2012 - May 23, 2012 (there will be no call for beam requests for this period).

We are further planning to operate:

Schedule 122 (OLIS & RIB)	May 28, 2012- August 23, 2012
Schedule 122 * meson hall	June 9, 2012- August 23, 2012
Schedule 123	August 29, 2011- December 22, 2011

Again, at this time we are opening the call for beam request for Schedule 121 (OLIS).

Thank you,

Jens Dilling
Science Division Head Deputy
