

The Low Energy Nuclear Physics Group at the Physics Division is now inviting interested applicants to apply for a Postdoctoral Appointee position to conduct research in the field of Experimental Nuclear Astrophysics at the Argonne Tandem Linac Accelerator System (ATLAS).

The successful candidate must have:

- Recently received his/her Ph.D. in physics or a discipline related to low energy nuclear physics within the last 3 years
- Experience at conceiving and executing experimental research projects and reporting the results
- Strong background in the area of nuclear astrophysics
- Experience with computer programming and data analysis.

The position is for 2 years, with the possibility of extension for up to 3 years depending on funding and performance. Interested applicants should forward a current CV along with three letters of reference to Dr. Melina Avila ([mavila@anl.gov](mailto:mavila@anl.gov)). Reviews of applicants will begin Nov. 26<sup>th</sup>, 2018 and will continue until the position is filled.

Candidates must apply on the Argonne National Laboratory career website (Requisition Number: 405288).

As an equal employment opportunity and affirmative action employer, Argonne National Laboratory is committed to a diverse and inclusive workplace that fosters collaborative scientific discovery and innovation. In support of this commitment, Argonne encourages minorities, women, veterans and individuals with disabilities to apply for employment. Argonne considers all qualified applicants for employment without regard to age, ancestry, citizenship status, color, disability, gender, gender identity, genetic information, marital status, national origin, pregnancy, race, religion, sexual orientation, veteran status or any other characteristic protected by law.
