

Transitioning from Academia into Industry with a Physics Degree

ON November 28 12 pm

Dear Fellow Grad Students and Postdocs,

You are invited to participate in a panel discussion on “Transitioning from academia into industry with a physics degree”.

Our guest panelists are:

Tommy Levi, Senior Data Scientist. Plentyoffish Media Inc,

Michele Petteni, Software Engineer, EA SPORTS,

Doug Schouten, Research and Innovation Associate, CRM Geotomography Technologies.

After a brief introduction highlighting their professional careers, our panelists will introduce themselves and describe their experiences, in particular their successful transition from the academic world into industry. The remainder of the event will consist of questions from the audience. Resumes, networking, interviews -- ask and find out how they did it. So, bring your questions!

If you are thinking of making this transition, this is great opportunity to meet and interact with three physicists who are now applying their knowledge in the private sector.

Pizza will be served at 11:45 am.
