

Graduate Pathways to Success/SCARL Workshop IV: Quantitative covariates and linear models

Wednesday, March 4th, 10:00 AM – 12:30 PM

Thea Koerner House, 6371 Crescent Road, Point Grey Campus

This is the fourth workshop in a 6-part statistics series.

NOTE: Due to the large # of statistical software available, this session will not be about any specific software but, rather, the methodology behind the software.

Topic: How to model the relationship between 2 quantitative variables by regression or correlation analysis. We then expand the regression model to include additional variables, including other quantitative variables (multiple regression) and categorical variables (ANCOVA).

About SCARL: The Statistical Consulting and Research Laboratory (SCARL) in the UBC Department of Statistics provides assistance in the statistical formulation of research questions, the design of experiments and sampling plans for surveys, the choice and explanation of statistical methodology, statistical computing and graphics, statistical analysis, the interpretation of findings, and more. SCARL also plays a role in continuing education on and off the UBC campus, giving seminars and workshops on statistical concepts and methodology to various departments and research groups and at teaching hospitals.

Presenter: Rick White has worked for the Statistical Consulting and Research Laboratory (SCARL) in the UBC Department of Statistics for over 20 years. For the last 7 years he has been the Managing Director of SCARL. Rick has consulted on many projects that cover a wide variety of statistically related issues, including experimental design, graphical displays of data, statistical modelling and data analysis. Through his consulting he has co-authored over 40 peer reviewed papers primarily in biostatistics and the "omics". His group is available to consult on an individual level with UBC researchers who need help with the statistical elements of their research.

Registration: Priority will be given to currently registered UBC graduate students. To register, please visit <https://www.surveyfeedback.ca/surveys/wsb.dll/s/1g3d93>

Confirmation of registration will be sent within two working days. If you experience any difficulty using the online registration tool, please e-mail graduate.pathways@ubc.ca.

Refreshments: Beverages will be provided. Please bring your own mug.
