

UBC e-library privileges will no longer be available to TRIUMF IP's through the equivalent of CWL access to ezproxy in UBC's new system

- **TRIUMF IP's continue to have direct access to Elsevier and IOP journals.**
- **UBC e-access is scheduled to change again May 2021 for all of UBC. If you can get access through status at another university, it might be wise to initiate that. We hope all students go through their universities.**

- **“The Faculty Authorization process**

<https://services.library.ubc.ca/borrowing-services/library-cards/faculty/> is available for TRIUMF staff involved in research with UBC faculty, which will extend library access in a manner that is compliant with UBC's license agreements.” UBC faculty or adjunct must send a Faculty Authorization form to request a UBC barcode and pin to let you access ezproxy.

Life Sciences, CMMS, Particle Phys, and Sci-Tech have been or will be contacted by faculty or adjuncts: others can initiate this request by emailing library committee chair behr@triumf.ca
