## ROADMAP TO CAREERS IN RESEARCH AND ACADEMIA

## **Networking Event**

TRIUMF Science Week 2021 Tuesday, August 17, 13:30 - 14:30

Curious about how to make the most out of grad school and the early stages of your academic career? Join us for a panel discussion with world-leading scientists and learn about the challenges they had to overcome, what they wish they knew before starting their careers, and what kept them on (tenure) track.

Dr. Anadi Canepa Fermilab, USA

Dr. Heather Crawford Berkeley Lab, USA

Dr. Eckhard Elsen CERN Director for Research and Computing, CH

Dr. Suzanne Lapi Alabama, USA

Dr. Nigel Smith
TRIUMF Director &
CEO, CA

Anadi Canepa is a senior scientist and head of the CMS Department at Fermilab whose work focuses on the exploration of the fabric of the Universe at the highest energy (and smallest scale) ever attained by humankind.

Heather Crawford's work focuses on low-energy nuclear structure and how the structure of exotic isotopes differs from the isotopes found naturally on Earth.

Eckhard Elsen, former Director for Research and Computing at CERN (2016-2020), is a scientist at DESY and professor at Hamburg University. Suzanne Lapi's research interests are in the development and translation of new PET radionuclides and molecular imaging agents. She is is the Vice Chair of Translational Research, and Cyclotron Facility Director at UAB.

Nigel Smith served as SNOLAB's Executive Director for 12 years before his transition to TRIUMF. His research interests focus on astroparticle physics and dark matter.
