Call for Proposals – March 2027 Nuclear Physics Experiment Evaluation Committee (NP-EEC) Meeting

Dear TRIUMF Experimenters, Users, and Staff,

The Nuclear Physics Experiment Evaluation Committee (NP-EEC) will meet in March 2027, and we invite submissions of Nuclear Physics Experiment proposals and progress reports. The following submissions will be accepted:

1. **New Proposals**.
2. New regular **Letters of Intent** (where beam or facility development is required; no shifts are requested).
3. **Progress Reports** for H-priority proposals that will expire at the March 2027 meeting (proponents will be contacted directly). These experiments must request reinstatement of unused, expired shifts if they wish to continue.

The specific meeting dates, format, and participation instructions will be communicated in advance.

Note on Progress Reports

Physical Sciences Division will contact spokespersons of expiring proposals that require a Progress Report. A template will be provided specifying the information to be included. This standardized format will help the committee assess reports consistently, considering the original high-priority approval of these experiments.

If you believe your experiment is due to expire and have not received a notification by December 15th 2026, please contact npeec@triumf.ca **well before the submission deadline.**

Discovery, accelerated

Deadline for Submission

Spokespersons of new proposals or Letters of Intent must contact npeec@triumf.ca by December 15th, 2026, to request an experiment number and complete **all** experiment form fields (experimental facility, isotopes, intensities, target and ion source requirements, if known, etc.). Spokespersons must also contact the Facility Coordinator before submission. **All required information, including the full proposal/report text (Proposals, Progress Reports, Letters of Intent), must be submitted by Monday, January 18, 2027, at 23:59 PST.**

Submissions should be made through the Science Applications Portal:

https://mis.triumf.ca/science/index.jsf.

Should users have any questions or concerns regarding the process for this upcoming NP-EEC meeting, please contact Chris Ruiz directly at ruiz@triumf.ca.

Yours sincerely,

Dr. Chris Ruiz
